1. General Information

These instructions are intended to assist trust companies subject to the *Trust companies and savings companies act, CQLR, c. S-29.02 (TCSCA)* and savings companies subject to the *Deposit institutions and deposit protection act, CQLR, c. I-32.2.2 (DIDPA)* in preparing their annual and semi-annual statements to the *Autorité des marchés financiers* (the “AMF”).

The purpose of these instructions is to facilitate understanding of the forms. They do not supersede or override any provisions or requirements under the Act.

In corresponding and communicating with regulated institutions, the AMF must, at all times, ensure that it complies with the *Charter of the French Language* and government policy regarding the use and quality of French. Accordingly, the AMF provides its regulated institutions with regulatory filings in French and approves the forms they are required to submit. However, to assist with comprehension, the AMF permits institutions whose head offices are outside of Québec to use the English versions of these forms, in compliance with the Act. Institutions whose head offices are in Québec are required to file the French version of the forms.

4. General Instructions

Consolidated Financial Reporting

The company must submit financial data on a consolidated basis. Data for certain subsidiaries must be reported under the equity method.

Refer to the *Capital Adequacy Requirements Guideline* to determine which subsidiaries must be deconsolidated for annual statement purposes.

Deconsolidated Spreadsheet

If the scope of consolidation for the annual statement and the audited financial statements differs, you must provide the AMF with a deconsolidation spreadsheet.

Generally Accepted Accounting Principles

Unless otherwise indicated, all amounts in Schedules 100 to 600 must be reported in accordance with Canadian generally accepted accounting principles with the exception when data for certain subsidiaries must be reported under the equity method as requested by the Capital Management Guideline.

Comparative information

Comparative information in the annual statement refers to:

- **Schedule 100:** data as at the previous year end.
- **Schedule 300, 400 and 500:** data for the previous year.

Comparative information in the interim statement refers to:

- **Schedule 100:** data as at the end of the same interim period of the previous year.
- **Schedule 300, 400 and 500:** data for the same interim period of the previous year.

Audits

Under section 96 of the TCSCA and 28.59 of the DIDPA, every Québec company must have its books and accounts audited every year by an auditor. In addition, every company must prepare, each year, on the form provided by the AMF, a statement of the position of its affairs to the date of the close of its last fiscal period. This annual statement, accompanied by the auditor's report on the reconciling of the data presented on Schedules 100 to 600 with those reported on the audited financial statements, must be transmitted to the AMF within two months of the date of the close of the company's last fiscal period.

AMF does not require to file the Notes to the financial statements.

The Canadian Auditing Standards (CASs) apply to an audit of financial statements and are to be adapted as necessary in the circumstances when applied to audits of other historical financial information.

Amendments

If annual or semi-annual statement data were amended after they were transmitted electronically to the AMF, you can re-file the amended statement as long as it appears in the disclosure schedule in E-Services. Otherwise, please notify the AMF by e-mail at soc.divulgations@lautorite.qc.ca so that we can inform you of the re-filing procedure.

Automatic Carry-over

The pages of the balance sheet and the statement of income contain shaded cells. In these cases, you must complete the corresponding schedules first. The data will be automatically carried over.

5. Schedules Instructions

Schedule 1100.1 Credit Ratings – Securities

General

For securities rating purposes, use the credit ratings of the following rating agencies:

- DBRS
- Moody's Investors Service
- Standard & Poor's (S&P)
- Fitch Rating Services

Financial entities are not allowed to “cherry-pick” the assessments provided by different external credit assessment institutions (ECAIs) and to arbitrarily change the use of ECAI.

If there is only one assessment by an ECAI chosen by a financial entity for a given claim, that assessment should be used to determine the risk weight of the claim.

If there are two assessments by ECAIs chosen by a financial entity which map into different risk weights, the higher risk weight will be applied.

If there are three or more assessments with different risk weights, the assessments corresponding to the two lowest risk weights should be referred to and the higher of those two risk weights will be applied.

An entity must choose the rating agencies it intends to rely on for assessing securities and then use their ratings.

Schedule 1210.2 Mortgage Loan Characteristics

Loan to Value Ratio (LTV)

The LTV ratio should be re-calculated upon any refinancing, and whenever deemed prudent, given changes to a borrower's risk profile or delinquency status, using an appropriate valuation/appraisal methodology.

Report the total value of mortgage loans according to their LTV categories at the time the loans are made. Include mortgage insurance when computing LTV ratios.

Amortization Period

Report the total dollar amount for mortgage loans based on the remaining amortization.

Total Debt Service (TDS) Ratio

The TDS ratio measures the debt service ability capacity of a borrower (or borrowers). The TDS ratio should incorporate, but not be limited to, factors such as principal and interest payments, heating costs, property taxes, 50% of condominium fees (if applicable), monthly payment amounts for other credit facilities, other sources of income, co-borrower and co-signor sources of income and own monthly payments on other credit facilities.

Credit Score

When there is more than one borrower, use the average of the borrowers' credit scores.

Schedule 4050 Maturities and Interest Rate Matching

The interest rate (%) represents the weighted average interest rate yield for each respective asset or liability positions, if applicable, or the weighted average yield earned directly by non-interest rate sensitive assets (e.g., income from real estate), if applicable.

The average interest rate for variable rate assets or liabilities should be calculated using the actual interest divided by the period-end balance.

Do not enter amounts in parentheses or negative values in this Schedule.
