

## **Notice of Publication of Report on Internet Insurance Offerings in Québec**

As part of a consultation on Internet insurance offerings in Québec, financial sector participants and consumers were invited to comment on the framework governing the distribution of Internet-based insurance products in general and, more specifically, on 13 proposals made by the Autorité des marchés financiers (the “Authority”).

The purpose of this consultation was to ensure that the regulatory framework adequately protects consumers, regardless of the means they use to purchase an insurance product.

Further to the consultation, the Authority pursued its discussions with stakeholders in order to better identify and address their concerns, and it noted technological changes and evolving consumer habits. The consultation findings are presented in the report Internet Insurance Offerings in Québec – Presentation of Consultation Findings and Orientations.
