Order Protection Rule: Market Share Threshold

Effective as of April 1, 2024

February 29, 2024

Introduction

On June 20, 2016, the Canadian Securities Administrators (the **CSA** or **we**) published a notice¹ (the **2016 Notice**) regarding the implementation of the market share threshold. This notice updates the list of protected and unprotected marketplaces published on February 23, 2023. The updated list will be in effect as of April 1, 2024, until a future notice is published. We note that the only changes relative to the last notice published are the addition of two new Alpha Exchange Inc. order books, specifically Alpha-X and Alpha DRK. There are no other notable changes.

Purpose

The purpose of this notice is to provide the list of marketplaces that display protected orders (**protected marketplaces**) and marketplaces whose orders will not be protected (**unprotected marketplaces**) for the purposes of *Regulation 23-101 respecting Trading Rules* (**Regulation 23-101**) and the order protection rule (**OPR**) because they do not:

- (i) provide automated trading functionality as they have an intentional order processing delay, or
- (ii) meet the market share threshold.

The market share threshold has been set at 2.5%.²

¹ CSA Staff Notice 23-316 Order Protection Rule: Implementation of the Market Share Threshold and Amendments to *Policy Statement to Regulation 23-101 respecting Trading Rules*.

² The 2016 Notice includes a description of the calculation of the market share threshold.

OPR Requirements

Section 6.1 of Regulation 23-101 requires marketplaces to establish, maintain and ensure compliance with policies and procedures that are reasonably designed to prevent trade-throughs of better priced protected bids and offers. Section 6.4 of Regulation 23-101 imposes the same requirement on marketplace participants that assume responsibility for compliance with OPR by entering directed-action orders.

Section 1.1 of Regulation 23-101 defines protected bids and offers as bids and offers displayed on a marketplace offering automated trading functionality, and about which information is provided to an information processor.

Section 1.1.2.1 of *Policy Statement to Regulation 23-101 respecting Trading Rules* outlines the circumstances in which a marketplace that introduced an intentional order processing delay would not be considered to be providing automated trading functionality. In those circumstances, the orders on that marketplace would not be protected.

Orders on “dark” marketplaces are not protected as they are not displayed. Therefore, orders on ICX, LiquidNet, MATCHNow, NEO Exchange dark book (NEO-D), Nasdaq CXD and Alpha DRK are unprotected for the purposes of OPR.
